13th IFKF ANNUAL MEETING
22 – 25 August, 2012
Budapest, Hungary
www.ifkfbudapest.com

POSTER ABSTRACT SUBMISSION FORM

Please check the appropriate category for this submission (check only one of the 2 boxes provided):

☐ World Kidney Day.

☒ Kidney Foundation Activities
(Examples would include: early detection and prevention programs; access to treatment in your country; or other activities such as organ donation)

Deadlines for Poster Abstracts related to WKD 2012; May 15, and for other Poster Abstracts; June 15.
These early deadlines result from a new initiative. We have created a special section on our new website www.ifkf.org for Abstracts and Visual Posters (see below). It creates for all members the opportunity to view Abstracts and Posters before Budapest, and to review and enjoy fully the content.

WKD Poster Competition Guidelines
Poster size: 1 meter tall x 70cm wide, readable from 1.5 meters.
Poster headings (titles) should be presented in type 5 cm high.

Visual posters for website and presentation on screen can be sent to Els de Weerd elsdeweerd@ifkfms.com in any picture format like JPEG, or in PDF.

Professor Joel Kopple is coordinator of these sessions. If the program allows, posters will not only be presented on boards, but also on screen.

POSTER ABSTRACT

Running (short) title: Current Data Analysis For ESRD Patients
Title: A Study on the ESRD Patients of TKF Dialysis Centers
Authors: Timur Erk, Ayse Onat, Mustafa Duyar

Abstract: (250 words or less explaining objective, scope, findings, or other interesting aspects of your submission.)

TKF provides RRT over 500 patients per year. Most of the patients have been receiving their medical treatment in TKF dialysis center over the years and there are numerous patients who are over the age of 60 and has been treated at TKF dialysis centers for 15-20 years. TKF has an enormous data to analyse to social and health conditions of those patients. In order to gather the information, all the patient files were looked through and the current data was determined. Social/demographical data such as gender, age, education level and health data such as dialysis quality measures, materials used, the blood test results, and other variables as well for 40 patients have been used for the pilot study and interesting outcomes were observed. Data gathering for 250+ patients are going on the final results are expected to report by the end of July 2012.

Key words: Turkey, RRT, dialysis patients, data analysis, demographical analysis
**Expected date for sending the visual poster in picture form like JPEG, or PDF:**

By the end of June 2012

**Contact Person and his or her coordinates including:**
